to consider for adult general medicine patients

Oral/Dental

Streptococcus sp.
Oral anaerobes
(*Peptostreptococci*)

GI

Streptococcus sp.
*Enterobacterales**

Malignancy,
immunosuppression

Enterococcus sp.

Colonic involvement,
bowel perforation

Gut anaerobes
(*Bacteroides* sp.)

* *Enterobacterales*

- Used to be called *Enterobacteriaceae*
- Enteric gram negative bacilli such as *E. coli*, *K. pneumoniae*

Urinary Tract

*Enterobacterales**

If *S. aureus* in urine,
assess for possible
bacteremia

RESP

S. pneumoniae
H. influenzae

HAP

S. aureus
Streptococcus sp.
*Enterobacterales**

Lung transplant,
CF, bronchiectasis,
immunosuppression,
ICU admission,
mechanical ventilation

Pseudomonas sp.

SKIN
