

Patient Information sheet

Patient Name: _____

Date of Birth: _____

Physician or Delegated Provider Ordering Test: _____

Oral Amoxicillin Test Performed on (dd/mm/yy): _____

Results of Oral Amoxicillin Challenge Test

Oral Amoxicillin test is **POSITIVE**

- You were given amoxicillin and had a reaction.
- We will update your hospital medical records with this information.
- Your family doctor will be notified, so your medical records can be updated.
- Your PharmaNet records will be updated, so your pharmacist will know not to give you any penicillin antibiotics in the future.
- We recommend that you get re-evaluated by an allergist in 5 years' time, as 50% of patients will lose their allergy to penicillin within this time.

Oral Amoxicillin test is **NEGATIVE**

- You were given amoxicillin and did not react to it.
- You have the same low risk of a serious reaction to penicillin antibiotics as those who have never had a history of penicillin allergy.
- We will update your hospital medical records with this information.
- Your family doctor will be notified, so your medical records can be updated.
- Your PharmaNet records will be updated, so pharmacists know you can receive penicillin antibiotics in the future.
- You should monitor yourself for any rashes over the next several days. Should a rash occur, please contact _____ and leave a message. Delayed rashes are often bothersome but do not increase your risk of life threatening (anaphylactic) allergic reactions.
- You should tell all of your doctors that you are not allergic to penicillin, and penicillin antibiotics can be used to treat any future infections.
